PROJECTS

• Task Management System

Duration: 4 Months
Status: On Going

- Created a task management system to help organize tasks, improve teamwork, and ensure tasks are completed on time. The system offers real-time tracking and better communication. It addresses challenges like system compatibility, data security, and user training. This system helps individuals stay organized, teams collaborate more effectively, and businesses manage projects better.

- **Role:** Frontend Developer

• Driver Security

Duration: 2 Months
Status: Completed

- The Drowsy Driver Detector's primary objective is to develop a system that can reduce the number of accidents caused by sleepy driving. Our different monitoring steps allow us to provide a more accurate detection.

• Other Projects

- Cloud Profile
- Calculator using React
